

Group work in the classroom is an effective method to encourage active learning and develop critical thinking skills. Research shows that group work can have a positive impact on learning outcomes.

Through group work, students are encouraged to become active learners by developing different skills. As they work in groups, students become involved in their own learning. Group work promotes student learning achievement because the students have the opportunity to learn from each other, which also enhances their social interaction skills.

Last month students from grades 7 and 8 were asked to work on different
